

Personal Commentary
Dr. Gale B. Frazier

Once and for all, we must decisively contend with, and bring down the evil forces of white supremacy racism and power structure. It is quite apparent to conscious folk, that there is an obvious overtly calculated plan to annihilate Black people; and we must not be deceived by it.

As we know and affirm, most civil and peaceful methods to thwart the demonic attacks from this wicked oppression have proven to be unsuccessful. The United States'—Nazis' Third Reich is reigning with unprecedented attacks against us through the use of law enforcement, political arena and other contrived entities within this country bearing no remorse or accountability. Irrespective to the fact that we have Blacks in various positions, this means nothing—make no mistake about it. It is simply a “puppet regime.”

The Black Holocaust through the genocidal tactics, murders and government sanctioned assassinations, mass incarceration, abortion and other controlled methods continue to be the caveat and mainstay of the day—we cannot afford to be asleep now. The execution of another son, Laquan McDonald, should prove even further that these Nazis mean business. The cover-up from those involved—those whom knew and said nothing but rather were complicit in this wicked act have innocent blood on their hands. And as such, there will be a day of reckoning at the appointed time—when the United States—aka Nuremberg Trials begin, and we will not forget.
